

LONG-LASTING COMFORT, LONG-LASTING SATISFACTION

Sofreliner Tough is a multi-award, self-cure chairside soft denture reline material, providing patient comfort and satisfaction up to two years in one short, simple application. Sofreliner Tough is suitable for relining upper, lower, partial or full dentures, as well as those that need relief for irritated tissues after surgery, teeth extraction, or implant procedures.

OUTSTANDING PRODUCT BENEFITS

- ✓ Long-lasting comfort up to 2 years
- ✓ Consistent softness
- ✓ Strong adhesion to the denture
- ✓ Excellent tear resistance
- ✓ Superior stain resistance
- ✓ Bacteria, plaque and odor resistance
- ✓ Plasticizer free
- ✓ Auto dispensing/no hand mixing composition
- ✓ Up to 40% less waste thanks to smaller mixing tips

Sofreliner Tough is available in Soft (S) and Medium (M) formulations to accommodate all soft reline cases.

Sofreliner Tough S

- Lasts up to 1.5 years
- Shore A hardness: 24

Sofreliner Tough M

- Lasts up to 2 years
- Shore A hardness: 43

CASES	SOFRELINER TOUGH S	SOFRELINER TOUGH M
Irritated Tissue	✓	
After Surgery or Teeth Extraction	✓	
Implants	✓

Mucous Atrophy	✓	✓
Major Undercuts	✓	✓
Maxillary/Mandibular Tori	✓	✓
Over Denture	✓	✓
Pain Relief	✓	✓
Improved Suction	✓	✓
First Time Denture Wearers	✓	✓

CONSISTENT SOFTNESS OVER TIME

- Sofreliner Tough maintains the same softness over time under different conditions

STRONG ADHESION

- After stimulated wear, Sofreliner Tough is proven to have the most durable adhesion over time than other products.

Tesnsile Bonding Test (%)	Sofreliner Tough S	Sofreliner Tough M	GC Reline Ultra Soft*	GC Reline Extra Soft*	GC Reline Soft*	Mucopren*
Interface Failure Initial	0%	0%	0%	0%	0%	0%
Interface Failure 10,000 thermal cycles**	0%	0%	80%	80%	60%	100%

EXCELLENT TEAR RESISTANCE

- Despite being softer than similar silicone based products, the Sofreliner Tough formulations have much higher resistance to tearing

HIGH DENTIST AND PATIENT SATISFACTION

- Sofreliner Tough offers high satisfaction to dentists and patients

BACTERIA, PLAQUE AND ODOR RESISTANCE

- Sofreliner Tough resists the build up of bacteria, plaque and odor better than the competitor thanks to long-lasting surface smoothness

SUPERIOR STAIN RESISTANCE

- Sofreliner Tough has a more natural appearance than many other reliner brands
- Sofreliner Tough resists staining and discoloration far better than other brands in even the most rigorous conditions

SILICONE REMOVER - COMPLEMENTARY PRODUCT

- With just a few drops, Silicone Remover allows you to peel away old silicone reliner, completing the denture reliner removal process without grinding and less mess. It can be purchased separately.

*In some cases, minimal cutting or grinding maybe needed to separate a small part of the soft reliner from the denture base before applying silicone remover.

STANDARD HANDLING TIME

STANDARD PROCEDURE GUIDE

1 Examine mouth

2 Examine denture

3 Remove resin with round bur for thickness of lining

4 Remove denture lining surface with cross cut round end tapered carbide bur

5 Bevel the borders of the denture to roll over the borders

6 Rinse and dry denture surface

7 Apply Primer on the denture lining area, and then **DRY it completely**

8 Apply paste evenly across all surfaces where Primer was applied

Soft formulation

10 Use **SHAPE ADJUSTMENT POINT (White)** to smooth the surface and adjust the shape

11 Use **FINISHING POINT (Brown)** to finish

Medium formulation

9 After intraoral setting (5+mins.), remove the denture from mouth and carefully trim excess material with a sharp scalpel

10 Use **Coarse Point (Black)** to smooth the surface and adjust the shape

11 Use **Finishing Wheel (Brown)** to finish

12 Lining completed

IMPORTANT TIPS

Primer Application:

1. Apply Primer to all surface to be lined thin and evenly.
2. Confirm the Primer surface is dry. If wet, air dry completely.

Paste Application:

The paste must be spread evenly across all denture surfaces to be

lined prior to insertion to avoid saliva contamination of the primer. Contamination could result in poor adhesion of the lining material to the denture.

Brush Cleaning:

Clean the brush with alcohol after each use. The use of a contaminated brush could lower the adhesion.

PRODUCTS

Sofreliner Tough S Kit

- 52g Cartridge
- 10mL Primer Bottle
- Accessories
 - Spatula (No. 001)
 - Brush (No. 5)
 - Drip-Cup
 - TD II Mixing Tips XS (x10)
 - Coarse Point (Black)
